

Web2Py - VueJS Scaffold Application

This is a small example of integration between VueJS and Web2py.

It includes:

- [vue.js](#)
- [Axios](#)
- [APIMaker](#)

(*) This is based on [this](#) app from the official [web2py](#) repo

How it works

- Clone this repo
- Run web2py shell
\$python web2py.py -S vue-scaffold -M
- In the shell populate the table
from gluon.contrib.populate import populate
populate(db.doc, 100)
- Then in your browser open
http://127.0.0.1:8000/vue-scaffold
